DETAILED ACTION

Allowable Subject Matter

Claims 1-15 and 21-25 are allowed.

Reasons For Allowance

The following is a statement of reasons for the indication of allowable subject matter: (see Applicant's arguments in the Amendment submitted on May 24th, 2004, on page 3, line 14 to page 4, line 8). Furthermore, Applicant's arguments in the Amendment after final submitted on September 20th, 2004, on page 3, line 2 to page 4, line 28, recited "By adding the claimed dopant material, the crystal lattice of the substrate is partially disrupted, creating the gettering sites...Applicant respectfully submits that the Office is incorrectly taking the position that the term dopant must be given its normal usage in the semiconductor field, that is, as a material added to change the electrical conductivity of a material such as silicon...Applicant has acted as his own lexicographer and has used the specification to supply a broader meaning for the term dopant than that contended by the Office...Thus, the property of trapping impurities in gettering sites is the desired physical property obtained by the dopants added to the plug fill material in the present invention. The dopant is not added for the purpose of altering the electrical properties, contrary to the more narrow use of the term dopant advanced by the Office".

Any comments considered necessary by applicant must be submitted no later than the payment of the issue fee and, to avoid processing delays, should preferably accompany the issue fee. Such submissions should be clearly labeled "Comments on Statement of Reasons for Allowance."
